In the case of an omni directional antenna like a dipole, azimuthal integration reduces to a multiplication by 2π . This fact was utilized to eliminate loops within the MatLab code. Once the total power radiated (P_{rad}) is known, the Directivity of the antenna can be

Prof Balanis is a master in Antenna Theory. I have read previous editions and was delighted with this book. The book is not for novices. A mastery of Maxwells equations is necessary to appreciate this book, fully. The Author develops the subject from fundamentals. Each chapter is very well organized and can be read, independently.
