Phases of the Moon | Astronomy Quiz - Quizizz

When the Earth, Moon and Sun are in a straight line (at new moon and full moon times), the pull is strongest and we experience Spring Tides, when high tides are highest and low tides are lowest. When the moon is at right angles to the line formed by the Earth and the Sun, the Moon's and Sun's gravities partially cancel each other out, and we have Neap Tides, which are more moderate.

Questions and Answers About the Moon - Casper Planetarium

The next phase, at about day 10, we can see roughly three quarters of the moon. This is called the waxing gibbous phase. After roughly 2 weeks, the moon is now in position with the Earth sitting between it and the sun, so we see its fully lit side as a full moon. It is not an exact alignment though, or the Earth would block the sun from the moon
