Let U_1 and U_2 be independent random variables. Suppose that U_1 is χ^2 with v_1 degrees of freedom while $U = U_1 + U_2$ is chi-square with v degrees of freedom, where $v > v_1$. Then prove that U_2 is a chi-square random variable with $v - v_1$ degrees of freedom. 4.2.13. Show that if $X \sim \chi^2(v)$, then $EX = v$ and $\text{Var}(X) = 2v$. 4.2.14.

Causality (also referred to as causation, or cause and effect) is influence by which one event, process, state or object (a cause) contributes to the production of another event, process, state or object (an effect) where the cause is partly responsible for the effect, and the effect is partly dependent on the cause. In general, a process has many causes, which are also said to be causal ...
